

1. The role of religion in the public schools: Religious teaching should be separate from public schools.
2. Teaching of established scientific facts such as evolution and climate change: This question is a bit strange to me, perhaps I'm naive. What are the alternatives, witchcraft, voodoo?
3. Abstinence-based sex education: We need to take a look at objective, science-based, fact-based sex education/awareness in our schools. If we don't educate our kids with the biology of being human they will be searching for answers without any clues.
4. Vouchers: (If you support vouchers, explain your justification for seeking to be a member of a public-school board:) Vouchers are not the answer to poor or underperforming public schools. The money allocated for vouchers should be reallocated to public schools.
5. Public school choice: This is problem displacement. All schools in all areas need to provide access to quality education.
6. Corporal punishment: I don't believe in this for a child at school any more than I do for my child at home.
7. Explain how you would respond to a parent who wants the district to limit access to, or remove books from the school library or classroom: I don't believe in book burning. It is the role of the School Board, Superintendent, and Faculty to determine which books will be used.
8. What public or private organizations have endorsed you and/or contributed to your campaign: None that I am aware of. I have no interest in being obligated to any organization.
9. Other statement or information you would like to have included: I believe we need to provide equal access to quality education for all of our Brevard County families. I think that a good education will lead to a resilient society.

David S. Worrells, Ph.D
